

Tank Cover - Anti Algae Floating

Description:

The Evenproducts woven polypropylene Anti Algae floating cover is designed with larger tanks in mind. The woven polypropylene material offers excellent UV protection preventing Algae growth, prevents wind-borne debris entering the water and allows rainwater to permeate through.

The structure of the cover is maintained using 40mm PVC pipe which is inserted into integral pockets.

Advantages:

- | |
|---|
| <ol style="list-style-type: none"> 1. Very Strong 2. Suitable for large diameter tanks 3. Easy to install 4. Prevents algae growth and wind borne debris entering the water |
