

Tank Cover - PVC

Description:

The Evenproducts PVC cover is designed to cover and overlap the top edge of the tank. The heavy-duty reinforced PVC material prevents Algae growth and wind-borne debris or rainwater entering the water.

The ball valve flap allows access for the supply as well as access for sampling the water.

Advantages:

1. Very Strong
2. Easy to install
3. Prevents algae growth and wind borne debris entering the water

A heavy duty tailored PVC cover draped over a centre support structure which is held in position and tensioned throughout, using adjustable polypropylene guy ropes attached to galvanised eye nuts.

The cover is available for all tank sizes from 2.74 to 7.32 metres (9' to 24') diameter, and can be supplied to fit any height of tank.
